

GSA 8(a) STARSII GWAC Contract Holder

Contract Number GS-06F-0708Z

## Providing technical services and solutions for our clients on a global basis

### SERVICES AVAILABLE

#### INFORMATION SYSTEMS

- Requirements analysis and site surveys
- Systems planning and COTS technology/cost assessment
- Network and IT systems analysis, design, and integration
- Hardware and software selection, procurement, and development
- Configuration, installation, and support

#### TELECOMMUNICATION SYSTEMS

- Cable plant distribution systems for voice, data, and video
- Design, installation, implementation, testing, documentation, and maintenance of Local and Wide Area Networks (LAN/WAN), backbone, intra-building backbone, and cutover support
- Route planning, site surveys, BOM, EIP support of projects
- Wireless network design, survey and installation
- Testing, validation, verification, and certification on cable plant to BICSI methodologies and TIA standards

#### ANTI-TERRORISM / FORCE PROTECTION SYSTEMS

- Design, installation, implementation, testing, documentation, and maintenance
- Intrusion detection and access control systems
- Closed Circuit Television (CCTV)
- Perimeter, weapons storage, flight line, X-ray, barriers, and other systems

#### RF SYSTEMS

- Design, survey, and installation of full service RF systems
- Construction and repair of antenna towers and structures
- Test, validation, and check out of antennas
- RF analysis and siting
- Experience with LMR, HF, UHF, and VHF radios
  - High-Powered HF and MF

SAIT is a joint venture between Socom Inc and ACT-Corp serving as an 8a, Service Disabled Veteran Owned Business incorporated in the Commonwealth of Virginia. Our technical focus is to provide IT, Telecommunications, Electronic Security, and RF Systems engineering and installation services that provide a continuum of converged services to meet all of our clients' needs. Our primary customer is the U.S. federal government. Our largest customers are the Department of State, Department of Defense, and the Department of Homeland Security.

Headquartered in Norfolk, VA, SAIT is equipped with 13,000 sq. ft. of flex space to include warehouse and integration support. This location provides easy access to the Norfolk International Airport and offers SAIT the ability to attract and retain fully qualified, cleared technicians in the Hampton Roads area. In addition, we maintain office space in the DC area and in Landstuhl, Germany. In the DC area we are located in the Springfield corridor with easy access to National Airport, Washington DC and other major facilities in the DC metropolitan area.

In Landstuhl, Germany, we have a 4,000 sq. ft. flex-space facility with qualified and cleared technicians that provide customers with the opportunity to dispatch personnel quickly and more cost effectively to many of the areas both in and surrounding the European Theater, including Southwest Asia operations. Together, both locations have allowed us to complete projects in over 125 countries on every populated continent with our client list growing. We have the experience and global reach to meet your geographical challenges.

We adhere to TIA standards, BICSI methodologies, and customer-specific requirements in order to develop an error free, standards based, design, and solution.

Our network systems experience includes designing, installing, upgrading and maintaining networks consisting various of Cisco routers and switches. Our experience with firewall devices includes the installation management and configuration of Cisco Pix/ASA and McAfee Sidewinder products. We also have managed ATM backbone connectivity utilizing Marconi ATM switches riding the DISA ATM backbone. We have utilized TACACS server to manage access to network devices such as routers, switches, and firewalls as well as various network management tools such as Solarwinds to manage multivendor network and computer equipment. We bring experience in large scale network management with high availability to ensure that clients meet their objectives without interruption.

We have developed a mature and disciplined approach to project management which ensures our services are delivered on time, the first time. Due to the geographic diversity of our projects, second chances are not an option. We have developed mature processes to include an ITIL-based Communications Services Framework along with an ISO-9001:2008 certified Quality Management Program and detailed policies and procedures.

Our commitment to standards and high quality solutions worldwide is our key to ensure our clients' success.
